

AMC CEMENT PLUGS™

CEMENT AND GROUTING ADDITIVES

Description

Displacement plugs are used in diamond wireline drill rods and casings for placing cement plugs or casing pack fluid.

Application

Commonly used for cleaning the inside of drilling rod and indicators during cementing or grouting operations. Place plug in drill rods in front of cement slurry, this is used as an indicator. Then place plug behind cement slurry, this will wipe excess slurry from rod walls.

Advantages

- Made of soft natural rubber
