

AMC EZEE CUT™

LUBRICANTS & CUTTING OILS

Description

AMC EZEE CUT™ is an extreme pressure cutting oil designed to help achieve optimum drilling performance. AMC EZEE CUT™ will provide lubrication and can significantly extend bit and reamer life which will benefit both cost and production.

Application

The primary application of AMC EZEE CUT™ is in diamond coring where enhanced cutting action and lubrication will improve penetration rates and minimise wear. AMC EZEE CUT™ is versatile and extremely easy to use, it can be considered for use in both surface and underground coring operations. AMC EZEE CUT™ will disperse rapidly and can be used in fresh, hard and saline conditions, and is compatible with most water based additives.

Typical Physical Properties

| | |
|-------------------|-------------------------|
| Appearance: | Dark amber liquid |
| Solubility: | Highly soluble in water |
| Specific gravity: | 0.8 – 0.9 |

Recommended Treatment

AMC EZEE CUT™ can be applied directly into the rod line or to the batching tank. To ensure maximum performance is achieved AMC EZEE CUT™ should be totally homogenized into the system before use. Recommended usage of AMC EZEE CUT™ is 3.0 – 7.0kg / m³ (1.0 – 2.5lb / bbl). Pipe size, formation conditions and depth will dictate the most beneficial concentration.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.

Advantages

- Efficient and easy to use
- Improves rate of penetration (ROP)
- Improves bit and reamer life
- Protects against corrosion
- Reduces rotational torque and drag
- Compatible with a range of water qualities
- Will not contribute to core staining
- Compatible with existing mud system.
