

AMC HARD SET™

CEMENT AND GROUTING ADDITIVES

Description

AMC HARD SET™ is a specially formulated fast setting, high strength cement.

Application

AMC HARD SET™ has been specifically formulated for use in dust suppression and cementing of collar pipes in RC, diamond and water well drilling applications.

Due to its accelerated setting time, the use of mechanical pumping equipment is not recommended.

Recommended Treatment

Add 5 L of water to 8 kg of AMC HARD SET™.
Initial set in 3 – 4 minutes, final set in 5 – 6 minutes.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.

Advantages

- Due to rapid setting time, rig idle time is considerably reduced
- Can be mixed quickly and poured into surface fissures to combat dust.
