

AMC ROD GREASE XTRA TACKY™

LUBRICANTS & CUTTING OILS

Description

AMC ROD GREASE XTRA TACKY™ is a specially formulated, tenacious, barium-based grease recommended for use on diamond drill rods to reduce vibration and friction between the rod and casing or rock strata.

AMC ROD GREASE XTRA TACKY™ is particularly effective in dry hole drilling, is thermally stable and will perform in a variety of harsh conditions. AMC ROD GREASE XTRA TACKY™ has superior adhesion characteristics designed to provide exceptional film strength when subjected to extreme down hole pressures.

Application

AMC ROD GREASE XTRA TACKY™ is easily applied to the outside surface of the drill pipe prior to inserting into the hole. Heat is not required to soften the product before use.

Typical Physical Properties

Appearance:	Light tan stringy
Thickener type:	Barium complex
Thickener content:	20 – 23%
Base oil viscosity: SVS @ 100°F:	775 – 1000

Recommended Treatment

Under normal drilling conditions:

N rods	Initially apply 1 – 2kg grease for 100m
--------	---

As the hole greases up use less after each bit change.

Dry hole conditions:

N rods	1 – 3kg grease for 100m
H rods	2 – 4kg grease for 100m
P rods	3 – 5kg grease for 100m

Hole conditions will vary and grease application should be adjusted accordingly.

Advantages

- Increases drilling efficiencies
- Adheres to the rod under virtually any condition
- Resistant to hard, saline water
- Thermally stable, extreme pressure resistance
- Can be applied to wet surfaces
- Reduces wear to the drill string
- Reduces rotational torque and vibration
- Improves productivity
- Protects metals surfaces.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.
