

AMC THREAD GREASE™

LUBRICANTS & CUTTING OILS

Description

AMC THREAD GREASE is a heavy duty thread compound containing specialised polymers and proprietary additives. It has a wide working temperature range, a low water wash value and aids in preventing corrosion. AMC THREAD GREASE is designed to reduce galling and friction and protects the threads from damage, wear and seizing.

Application

AMC THREAD GREASE is designed to be suitable for use in both wire line and air drilling applications. It should be applied generously to the tool joints and threaded sections of drill pipe and is normally applied with a brush, spatula or other suitable item. AMC THREAD GREASE is extremely tenacious, adhering to all metal surfaces.

Typical Physical Properties

Appearance: Tacky paste

Solubility in water: Immiscible

Advantages

- Easily applied
- Excellent lubricating properties
- Resistant to water wash
- Resistant to high temperatures
- Exceptional adhesion characteristics
- Good anti-wear properties
- Good anti-seize and sealing properties
- Helps prevent corrosion.

Recommended Treatment

Apply generously to the tool joints and threaded sections of drill pipe.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.
