

AMC TUBE LUBE™

LUBRICANTS & CUTTING OILS

Description

AMC TUBE LUBE™ is a vegetable oil based soap that has been developed to enable the core sample to enter and slide more easily into the inner tube promoting longer runs through fractured broken formations. AMC TUBE LUBE™ will protect and improve the life of the inner tube, is water soluble and will not stain the core.

Application

AMC TUBE LUBE™ is applied liberally to the inner tube surface before it is lowered and released into the core barrel.

Typical Physical Properties

Appearance: Thick amber to yellow paste
Specific gravity: 1.0 – 1.01

Recommended Treatment

AMC TUBE LUBE™ can be placed generously on the inside of the inner tube or smeared lightly over the entire surface area and lifter.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.

Advantages

- Facilitates longer coring runs in broken formations
- Good adhesion and lubricating properties
- Minimises wear of the inner tube and core lifter
- Will not stain the core
- Compatible with most drilling fluids.
