

AMC BREAKOUT BLUE™

LUBRICANTS & CUTTING OILS

Description

AMC BREAKOUT BLUE™ is a high performance, anti-seize grease that has outstanding film strength and resistance to corrosion, particularly in wet environments. It contains no heavy metals making it a more environmentally acceptable option than greases containing metals such as lead or zinc.

Application

AMC BREAKOUT BLUE™ is applied generously to the tool joints and threaded sections of drill pipe, normally applied with a brush, spatula or suitable item.

Typical Physical Properties

Appearance:	Blue semi solid
Solubility in water:	Insoluble
Specific gravity:	0.8 – 0.9

Recommended Treatment

Apply generously to the tool joints and threaded sections of drill pipe.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.

Advantages

- Easily applied
- Resistant to high temperatures
- Exceptional adhesion characteristics
- Minimises wear
- Preventative towards corrosion
- Contains no heavy metals
